

# 2026 Remount Shower

Existing condition (spring 2025):

Problems:

- galvanized pipe is corroding
- too much weight hanging on ceiling (fell down in 2025)

Plan:

- Mount shower heads from the wall (on the lumbar right above the shower enclosure)
- Replace pipes for shower with PEX-B

## STATUS AS OF FALL 2025

- **During the fall visit to the Gayflower we took down the existing showers but we didn't have time to put up new ones.**
- **If we want to get the showers working again, we'll need the following parts:**
  - **4x Standard Shower Arm (45° bend, M-M 1/2 pipe)**
  - **About 4x 3/4" - 3/4" - 1/2" reducers (sharkbite or PEX-B)**
  - **A bunch of 3/4" and 1/2" ells (sharkbite or PEX-B)**
- **Everything else we need for this project is already in the Gayflower under the sinks**
- **The condition of the Gayflower is pretty miserable; we might just build a new shower trailer. See #gayflower channel in discord for the latest discussion**
