Where is it?

This flowchart shows how we decide where to store most things.

The detailed [**Where Is It?**](#) spreadsheet helps you track down exact locations down to shelf and bin, especially of specific tools and items in the Tool Fort.

Camp Supplies

What we call "supplies" are anything consumable that we stock up on before each burn to have on hand: things like batteries, towels, cleaning supplies, and so forth. This does **not** include anything used by the food team.
