

2027 Camp Layout

New Turtle Cafe Bar

Jetpack is working on a new bar. The idea is to have more space for our café program and make it look a little nicer and more organized.

There are six segments which can be folded and flat-packed. Each segment can either be used for a Dometic cooler, a regular cooler, or can have a shelf in the middle. The height is 36".

This is being built in East Hampton out of marine grade mahogany plywood. If you can come out for a weekend to help build this it would be appreciated!

Revision #2
